Gang Xie

Master's Student in Computer Science

siegang@163.com Hangzhou, China Vanillaffles

Profile

Master's student at Hangzhou Dianzi University researching brain-inspired multimodal affective computing and reliable AI systems.

Education

Hangzhou Dianzi University Hangzhou, China
Master's degree, Computer Science and Technology Sept 2024 – June 2027
- Top 5% in major

Kunming University of Science and Technology Kunming, China
Bachelor's degree, Intelligent Science and Technology Sept 2019 – June 2023
- Top 5% in major

Experience

Diling Zhiyuan Technology Co., Ltd., Algorithm Engineer Intern Hangzhou, China
Contributed to algorithm development and engineering projects for intelligent content and information processing. Sept 2025 – Aug 2026
1 year

Projects

PROSE Oct 2025 – Sept 2026
LLM reflection-driven multi-objective evolution for robust prompt optimization in multi-modal content moderation.
- Combined performance with a semantic abstraction proxy on a Pareto frontier to reduce case memorization and shortcut learning.
- Built configuration-driven task adapters, heterogeneous model pools, concurrent evaluation, SQLite persistence, lineage tracking, and checkpoint recovery.

IntentSafe-CN May 2026 – Aug 2026
Multi-layer diagnostic benchmark for intent-aware Chinese harmful-content detection.
- Studied the contribution of surface signals, context, and communicative intent to downstream safety decisions.
- Designed experiments, trained a lightweight intent model with LoRA, analyzed results, and prepared paper figures.

Publications

From Enumeration to Principle: Robust Prompt Optimization via Semantic Reflection and Multi-Objective Evolution 2026
Accepted first-author paper introducing PROSE.
Gang Xie
(Findings of EMNLP 2026)

NeuroSIFT: A Biologically-Inspired Framework with Explicit Signal-Noise Separation for Robust Multimodal Emotion Recognition 2026
Accepted first-author paper on robust multimodal emotion recognition.
Gang Xie
(ICASSP 2026)

Skills

Research (Advanced): Multimodal affective computing, multimodal emotion recognition, multimodal sentiment analysis, robustness, signal-noise separation

Large language models (Advanced): Prompt optimization, semantic reflection, multi-objective evolution, content safety, intent-aware detection

Engineering (Advanced): Python, PyTorch, Transformers, PEFT/LoRA, FastAPI, REST, SQLite, FAISS, Git

Awards

Huawei Software Elite Challenge, Hangzhou-Xiamen Division, Second Prize 2025
Huawei

Blue Bridge Cup, National Second Prize 2022
Blue Bridge Cup
